4.1 Description of first aid measures:

General information	Remove contaminated, soaked clothing immediately and dispose of safely. Take affected person to fresh air. Remove affected person from danger area and lay down. In case of allergic symptoms, especially respiratory trace related, seek medical help immediately. In any case, show the physician this Safety Data sheet
Following inhalation:	Move into fresh air and keep calm and comfortable. Ensure supply of fresh air. Get medical advice/attention if symptoms develop/persist.
Following skin contact:	Wash off immediately with soap and water. Get medical advice if skin irritation develops/persists.
Following eye contact:	Separate eyelids and wash the eyes thoroughly with water for 15 minutes. Get medical advice/attention if symptoms develop/persist.
Following Ingestion:	Rinse out mouth and drink plenty of water. Get medical advice/attention if symptoms persist/develop.

4.2 Most important symptoms and effects, both acute and delayed

4.3 Indication of any immediate medical attention and special treatment needed

SECTION 5: FIRE FIGHTING MEASURES

5.1 Extinguishing media:	Suitable extinguishing media: Foam, dry chemical extinguisher, carbon dioxide, water/water spray, dry powder.
5.2 Special hazards arising from the substance or mixture:	Hazardous combustion products: Toxic and combustible gases can be formed
5.3 Advice for fire-fighters:	Do not inhale explosion and/or combustible gases. Wear protective clothing. Fire residues and contaminated fire-fighting water must be disposed of in accordance with the local regulations Wear full body protective clothing with breathing apparatus. Use water delivered as a fine spray to control fire and cool adjacent area. Avoid spraying water onto liquid pools. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected FIRE/EXPLOSION HAZARD Combustible.

	Slight fire hazard when exposed to heat or flame. Heating may cause expansion or decomposition leading to violent rupture of containers. On combustion, may emit toxic fumes of carbon monoxide (CO). May emit acid smoke. Mists containing combustible materials may be explosive. Combustion products include: carbon dioxide (CO₂), other pyrolysis products typical of burning organic material. May emit poisonous fumes of Acrolein if heated above 280°C. Acrolein appears as a colourless gas in smoke and is highly toxic. It causes severe irritation to exposed skin, eyes and the nasal passage. May emit corrosive fumes. FIRE INCOMPATIBILITY Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result. PERSONAL PROTECTIVE EQUIPMENT Fire fighters should wear a positive-pressure self-contained breathing apparatus (SCBA) and protective firefighting clothing (includes firefighting helmet, coat, trousers, boots and gloves).
