| Water                                                   | 7732-18-5 | <25%            | n/a                                     |
| Colouring (caramel)                                     | 8028-89-5 | <2%             | n/a                                     |

## SECTION 4: FIRST AID MEASURES

### 4.1 Description of first aid measures:

|                                            |                                                                                                                                                                                                                                                                               |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Following inhalation:</b>               | If inhaled, remove affected person from contaminated area to a fresh air source. Keep at rest until recovered. If symptoms develop and/or persist call a Poison centre or seek medical attention.                                                                             |
| <b>Following skin contact:</b>             | Wash skin with plenty of water. Remove contaminated clothing and wash before re-use. Seek medical attention if irritation persists                                                                                                                                            |
| <b>Following eye contact:</b>              | Immediately wash eyes with copious amounts of water while holding the eye open (for at least 20mins). Remove contact lenses. Continue rinsing. Protect unharmed eye. Seek medical attention if irritation persists.                                                           |
| <b>Following Ingestion:</b>                | Rinse out mouth with water. Give water to drink in order to dilute stomach contents. Do not induce vomiting. If a person vomits when lying on their back, place them in the recovery position. Never give anything by mouth to an unconscious person. Seek medical attention. |
| <b>Self protection of the first aider:</b> | Move out of dangerous area. Never give anything by mouth to an unconscious person.                                                                                                                                                                                            |

### 4.2 Most important symptoms and effects, both acute and delayed

Not available

### 4.3 Indication of any immediate medical attention and special treatment needed

Not available

## SECTION 5: FIRE FIGHTING MEASURES

|                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>5.1 Extinguishing media:</b>                                   | <b>Suitable extinguishing media:</b><br>Use Water fog (or if unavailable fine water spray), alcohol-resistant foam, dry chemical, sand or carbon dioxide.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>5.2 Special hazards arising from the substance or mixture:</b> | <b>Hazardous combustion products:</b><br>Do not allow run-off from firefighting to enter drains or water courses.<br>Flash back possible over considerable distance.<br>Do not use solid water stream as it may scatter and spread fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>5.3 Advice for fire-fighters:</b>                              | In the event of fire, wear self-contained breathing apparatus. In the event of fire and/or explosion do not breathe fumes. Use water spray to cool unopened containers. Keep upwind. Consider evacuation. Shut off all possible sources of ignition. If safe to do so, remove containers from path of fire. Keep containers cool with water spray. Heating can cause expansion or decomposition leading to a violent rupture of containers. On burning will emit toxic fumes including those of carbon monoxide and carbon dioxide. Fire fighters to wear self-contained, breathing apparatus, if risk of exposure to vapour or products of combustion. And protective gloves and boots. |

## SECTION 6: ACCIDENTAL RELEASE MEASURES

|                                                                                |                                                                                                                                                                                                                                                                                                           |
|--------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>6.1 Personal precautions, protective equipment and emergency procedures</b> |                                                                                                                                                                                                                                                                                                           |
| <b>6.1.1 For non-emergency personnel</b>                                       | Ensure adequate ventilation. Eliminate sources of ignition. Consider need for evacuation. Clear area of all unprotected personnel. Wear appropriate protective clothing and respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. |
| <b>6.1.2 For emergency responders</b>                                          |                                                                                                                                                                                                                                                                                                           |
| <b>6.2 Environmental precautions:</b>                                          | Prevent the material from entering drains or water courses. If unpreventable, advise authorities. Use temporary bund or impervious barrier. Prevent further leakage or spillage if safe to do so.                                                                                                         |
| <b>6.3 Methods and material for containment and cleaning up</b>                |                                                                                                                                                                                                                                                                                                           |
| <b>6.3.1 For containment:</b>                                                  | Contain and absorb using earth, sand or other inert material. Sweep up, wiper up or vacuum up spillage and collect in suitable container for disposal. Transfer into suitable containers for recovery or disposal. Spillages will create a fire hazard.                                                   |
| <b>6.3.2 For cleaning up:</b>                                                  |                                                                                                                                                                                                                                                                                                           |
| <b>6.3.3 Other information:</b>                                                | Suppress (knock down) gases/vapours/mists with a water spray jet.                                                                                                                                                                                                                                         |
| <b>6.4 Reference to other sections</b>                                         | For personal protection see section 8.                                                                                                                                                                                                                                                                    |

## SECTION 7: HANDLING AND STORAGE

|                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7.1 Precautions for safe handling:</b>                                | <b>Protective measures:</b> Use in a well ventilated area. Avoid inhaling vapour. Avoid contact with eyes, skin and clothing. Keep container tightly closed when not in use. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Use explosion-proof equipment. Do not spray on a naked flame or any incandescent material. When using do not smoke. Keep away from open flames, hot surfaces and sources of ignition. Minimised exposure is advised as the health effects of this material have not been fully assessed. Avoid formation of aerosol. |
| <b>7.2 Conditions for safe storage, including any incompatibilities:</b> | Store in a cool, dry area, well-ventilated area, away from direct sunlight. Keep away from sources of heat or ignition. Do to the nature of the application of this product, store away from odorous, toxic, harmful or corrosive materials.                                                                                                                                                                                                                                                                                                                                                                   |
| <b>7.3 Specific end use(s):</b>                                          | Not available                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

### 8.1 Control parameters

#### 8.1.1 Occupational exposure limits:

| Substance          | CAS Registry Number | TWA (mg/m <sup>3</sup> )           | STEL          |
|--------------------|---------------------|------------------------------------|---------------|
| <u>New Zealand</u> |                     |                                    |               |
| Ethanol            | 64-17-5             | 1880 mg/m <sup>3</sup><br>1000 ppm | Not available |
| Glycerine          | 56-81-5             | 10 mg/m <sup>3</sup>               | Not available |

**Information on monitoring procedures:** Not available

**DNEL/DMEL and PNEC-Values:** Not available

### 8.2 Exposure controls

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8.2.1 Appropriate engineering controls:</b> | Not available                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>8.2.2 Personal protection equipment:</b>    | <p><b>Eye and face protection:</b><br/>Chemical goggles, safety glasses or face shield. Eye wash bottle with pure water.</p> <p><b>Skin protection:</b><br/>Wear chemicals-resistant gloves, e.g. safety gloves of chloroprene Level 2 or of butyl rubber Level 6; Overalls. Lightweight protective clothing. Remove and wash contaminated clothing before re-use.</p> <p><b>Respiratory Protection:</b></p> |

|                                               |                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                               | <p>Respiratory protection is required if there is a risk of exposure to high vapour concentrations.</p> <p><b>Hygiene measures:</b> Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product.</p> <p><b>Protective measures:</b> When using, do not eat, drink or smoke.</p> |
| <b>8.2.3 Environmental exposure controls:</b> | Not available                                                                                                                                                                                                                                                                                                                       |

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

|                                                       |                                                    |
|-------------------------------------------------------|----------------------------------------------------|
| <b>Appearance:</b>                                    | Dark brown opaque liquid                           |
| <b>Odour:</b>                                         | Coffee/Chocolate aroma. Typical Irish Cream notes. |
| <b>Odour threshold:</b>                               | Not available                                      |
| <b>pH:</b>                                            | Not available                                      |
| <b>Melting point/ freezing point:</b>                 | Not available                                      |
| <b>Initial boiling point and boiling range:</b>       | Not available                                      |
| <b>Flashpoint:</b>                                    | 58°C (ASTM D93A)                                   |
| <b>Evaporation rate:</b>                              | Not available                                      |
| <b>Flammability (solid, gas):</b>                     | Not available                                      |
| <b>Upper/ lower flammability or explosive limits:</b> | Not available                                      |
| <b>Vapour pressure:</b>                               | Not available                                      |
| <b>Relative density:</b>                              | Not available                                      |
| <b>Solubility:</b>                                    | Miscible in water and ethanol                      |
| <b>Partition coefficient: n-octanol/water:</b>        | Not available                                      |
| <b>Auto-ignition temperature:</b>                     | Not available                                      |
| <b>Decomposition temperature:</b>                     | Not available                                      |
| <b>Viscosity:</b>                                     | Not available                                      |
| <b>Explosive properties:</b>                          | Not available                                      |
| <b>Oxidising properties:</b>                          | Not available                                      |

## SECTION 10: STABILITY AND REACTIVITY

|                                                 |                                                                            |
|-------------------------------------------------|----------------------------------------------------------------------------|
| <b>10.1 Reactivity:</b>                         | Product is stable under normal conditions of use, storage and temperature. |
| <b>10.2 Chemical stability:</b>                 | Product is stable under normal conditions of use, storage and temperature. |
| <b>10.3 Possibility of hazardous reactions:</b> | No dangerous reaction known under conditions of normal use.                |
| <b>10.4 Conditions to avoid:</b>                | Avoid excessive heat, flames, ignition sources and incompatibles.          |
| <b>10.5 Incompatible materials:</b>             | Not available                                                              |
| <b>10.6 Hazardous decomposition products:</b>   | Not available                                                              |

## SECTION 11: TOXICOLOGICAL INFORMATION

### 11.1 Information on toxicological effects

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
